INSTALLATION AND USE

BC submersible pumps are suitable for draining **dirty and filthy water** in domestic and civil applications. They come equipped with a **DOUBLE-CHANNEL** stainless steel impeller and are capable of pumping liquids containing short fibred suspended solids up to Ø 50 mm.

They are ideal for pumping sewage, waste water, surface water and water mixed with mud in locations such as blocks of flats and detached houses.

These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.
